Duke Home Infusion provides compassionate, quality home infusion therapies using a multidisciplinary approach to achieve the best possible patient outcomes and to enhance quality of life.

Home infusion therapy is the administration of intravenous (through a vein) medications to patients in their own home. Home infusion is a highly cost-effective approach to IV therapy by decreasing the length of stay in the hospital. Small, portable pumps allow medication to be administered through an IV line making it possible for many patients to go about their normal daily activities.

Patients receiving home infusion enjoy the satisfaction of returning to their own surroundings, resuming daily activities, taking an active role in their own care, and even, when appropriate, returning to work. These activities offer significant emotional benefits that, in turn, facilitate healing.

Service Area
Duke Home Infusion serves patients throughout North Carolina, South Carolina, and Virginia.

- Midline Certified RNs
- Disease State Management Programs

How to Make a Referral

Call our Referral Coordinator at 919.620.DUKE (3853) or 800.599.9339.

Referrals are taken 24 hours a day. After hours, referrals will be processed by our on-call staff. The following information is helpful at the time of the referral:
- Patient name, date of birth, post-discharge address, and phone number
- Diagnosis
- Physician’s name and phone number
- Insurance information
- Caregiver or family contact name and phone number

A designated Infusion Team member will initiate and coordinate all home infusion needs in conjunction with the facility discharge planner, social worker, or other healthcare professional.

Comprehensive patient education and training occurs prior to discharge with a visit from our Care Coordinator. This education will continue at the patient’s and/or caregiver’s own pace. Our own Pharmacy will dispense all medications and supplies to the patient’s home.

How Is Care Paid For?
- Medicare
- Medicaid
- Private Insurance
- Self Pay

Throughout the course of your home infusion therapy our staff will maintain regular communication with the patient/caregiver and performs follow-up visits according to individualized patient needs. If additional home care services are needed, we will serve as your liaison between your physician, insurance company, or other members of your healthcare team. Our team is available 24 hours a day, 7 days a week.
